I have the honor to be,
Sir,
Your most obedient servant,

For Chief Secretary to Government

Application dated 16th April 1924 from B. Krishnaswamy Chetty, No. 53, Doddapetta, Mysore, to the Private Secretary to His Highness the Maharaja of Mysore.

23

I beg to place the following few lines for your kind and generous consideration. I am a subject of H.H. the Maharaja of Mysore and belong to the Vysya community, a community which is very backward in higher education and scarcely represented in the Government of this State. Having studied at the Engineering College in Bangalore for 4 years and undergone the necessary practical training, I took the B.E. degree in the year 1922. I belong to the very first batch of students that came out -- successful from the college. These two years and more I have been trying to enter the Government service and thus serve my native country; but to my misfortune I have not been able to secure an appointment till now.

I now hear that the government have sanctioned the entertainment of Mechanical Engineers for Railway, Electric and Printing departments. As I have myself fully qualified for the same, I earnestly request you to kindly recommend my case and secure me an appointment in any of the above three departments for which act of kindness I shall remain ever grateful to you and I request you to permit me to assure you that I will discharge the duties entrusted to me to the full satisfaction of the officers and thus prove myself worthy of your patronage.

Once more requesting you to give my case your generous and strong support.

P.S. I have herein enclosed all my certificates.

SIR,

With reference to G. O. No. G. 338-9/P. & S. 55-23-4, dated the 18th July 1924, directing the submission for the information of Government of the course of training prescribed for the Probationer newly appointed for the Press, I have the honour to state as follows:--

During the period of probation, the Probationer will be trained in the three main branches of the Press, viz., the composing, the proof-reading and the Printing sections. He will actually work in these three branches for a period not less than 6 months in each branch so that he may acquire a thoroughly practical knowledge of every detail of printing. He will thereafter be allowed to work in the office branch and the valuation section to enable him to acquaint himself of the nature of Press correspondence and the method of valuing jobs executed in the Press. He will also be trained in the binding section.

He will be required to successfully pass the examinations in Compositors' work, the Proof-readers'work and Machine work held in November of each year by the~~M~~Madras Government Technical Examination Board and to this end he will be given theoretical instruction by placing within his reach all the necessary technical books and offerring all explanations and elucidation that he may be in need.

The Probationer must always be prepared to carry out whatever duties may be required of him for his thorough training and must conform to all the rules that regulate the working of the Press. At the end of the Probationary period, if he passes the Technical Examinations and if his actual progress is found satisfactory, he may be required to undergo further higher training, if deemed necessary.

These are the main conditions under which the Probationers have been trained in the Press on previous occasions and they may be made applicable to the new Probationer as well.

Half-yearly reports about ~~this~~ his progress will be submitted as required.

I have the honor to be,
Sir,
Your most obedient servant,
